Scan or click QR code for
instruction video.

1 IAG Radiator Shroud

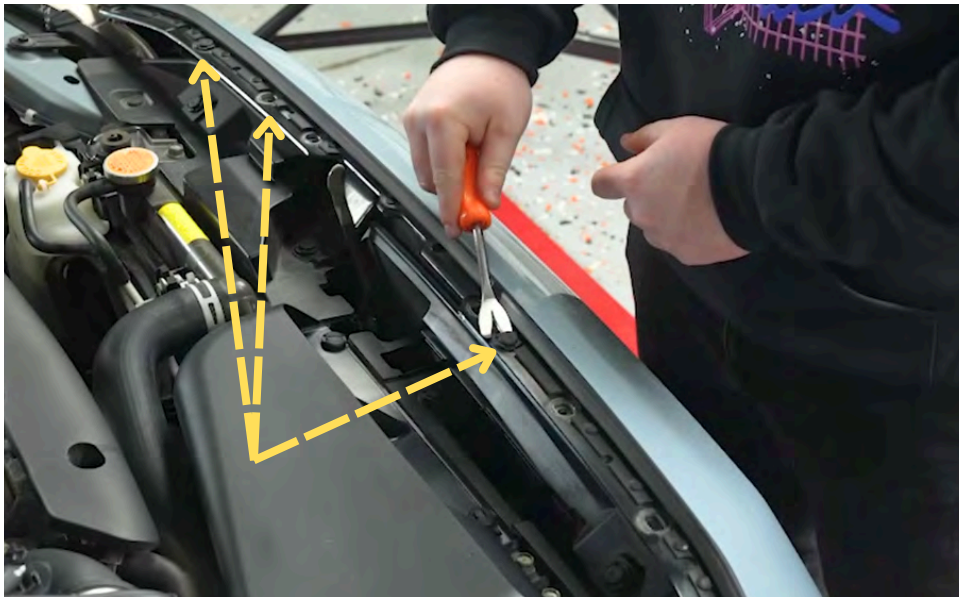

Step 1

Bumper removal is required to remove factory Radiator Cover.

Start by removing the six 10mm bolts from the top of the bumper.

Step 2

Using a small pry tool, remove three push clips from top of the bumper.

Step 3

Remove the rubber strip from the top of the bumper.

Step 4

Remove the push clip from both wheel wells.

Step 5

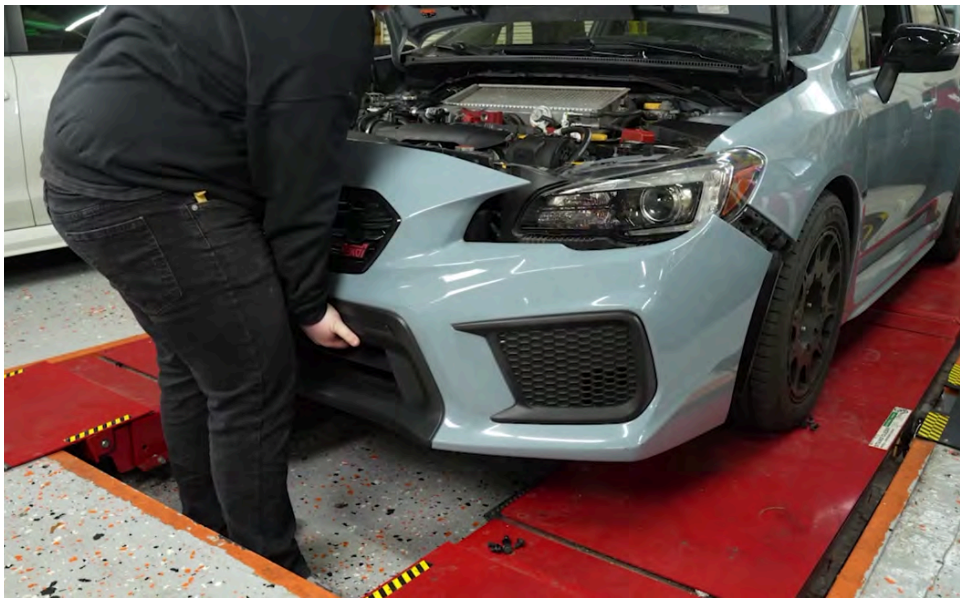

Remove the nine push clips from the bottom of the bumper.

Step 6

Loosen edges of the bumper from the vehicle by hand or with a plastic pry tool.

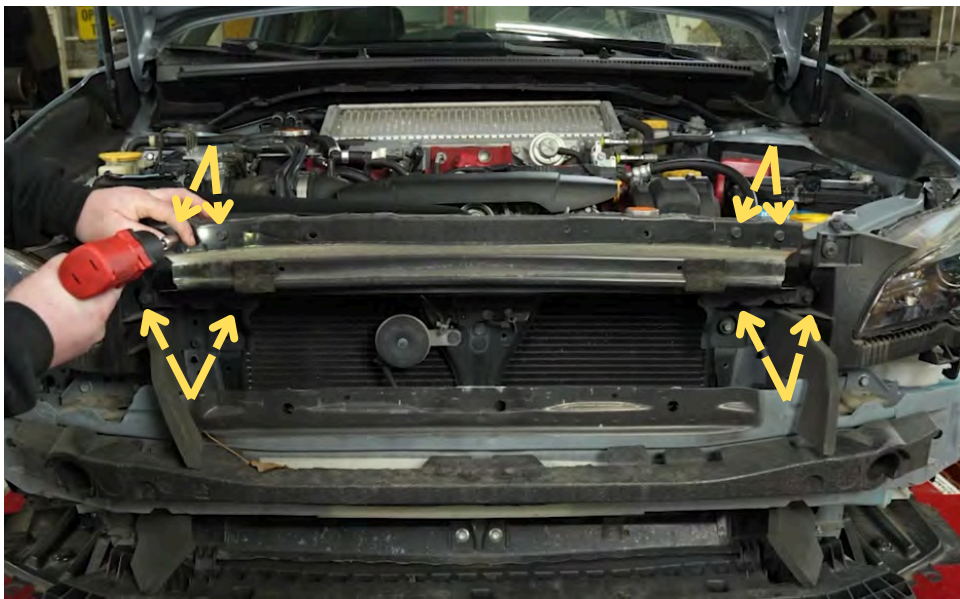

If vehicle is equipped with fog lights, disconnect the fog lights.

Step 6 pt. 2

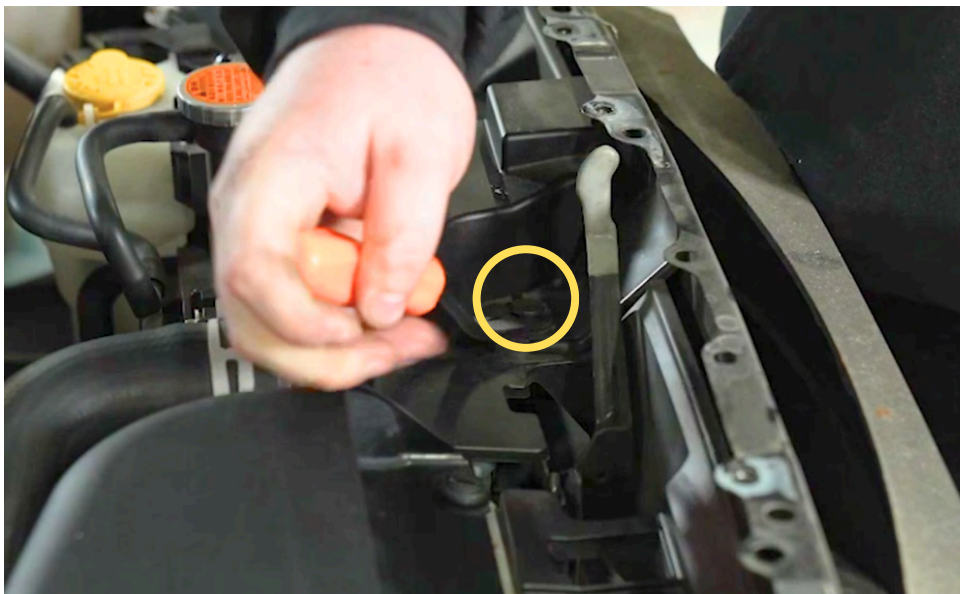

Using even force, pull the bumper away from the vehicle.

Remove bumper and set aside.

Step 7

Remove the eight 10mm bolts from the Upper Support Bar.

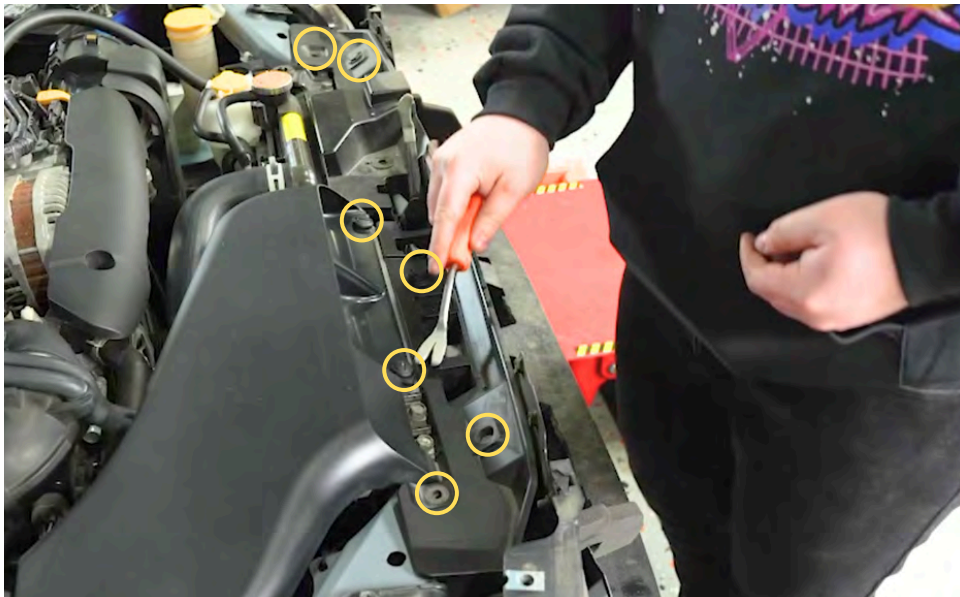

Step 7 pt. 2

Remove the push clip from the Upper Support Bar.

Step 7 pt. 3

Remove Upper Support Bar.

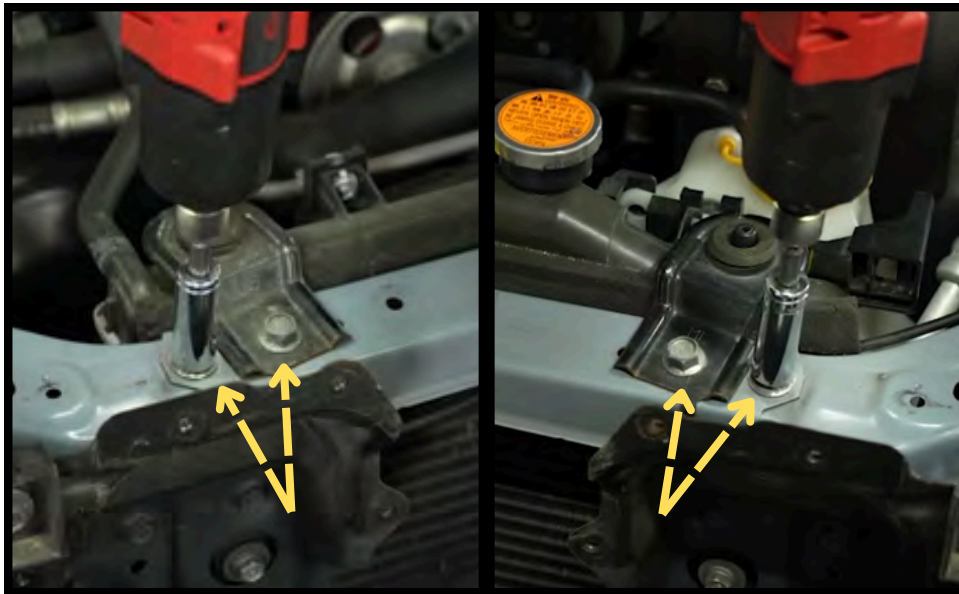

Step 8

Remove the seven push clips from the factory Radiator Cover and Intake Air Duct.

Step 8 pt. 2

Remove the factory Radiator Cover and Intake Air Duct.

Step 9

Remove the four 12mm bolts from the Radiator Stays and Radiator Support Bar.

Remove the Radiator Stays.

Step 10

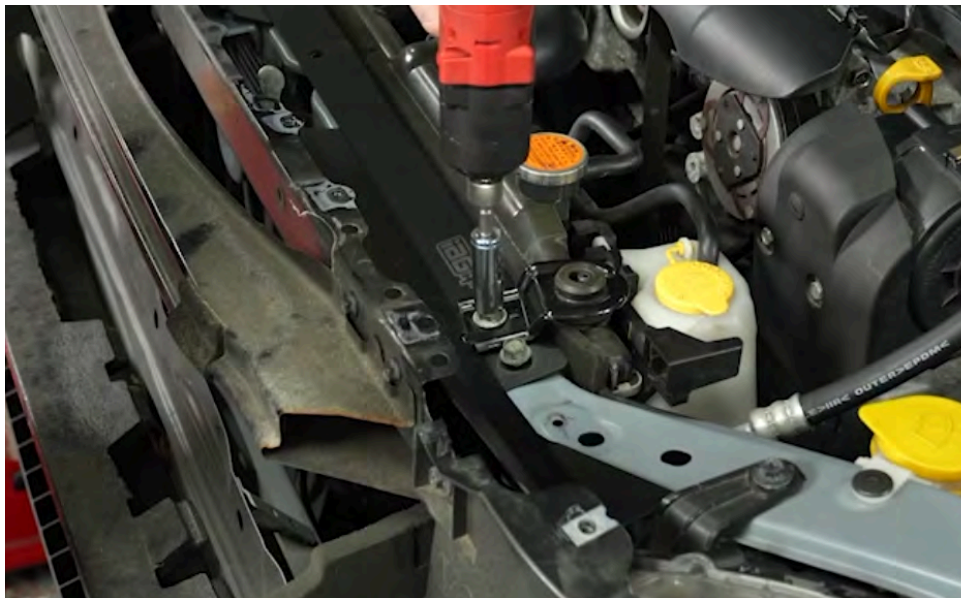

Reinstall the factory Upper Support Bar with the factory hardware.

Step 11

Install the new IAG Radiator Shroud.

Step 12

Reinstall the Radiator Stays with the factory bolts.

Reinstall the Radiator Support Bar bolts.

Step 13

Reinstall the Intake Air Duct.

Reinstall the bumper in reverse order of removal.
